

Preliminary Research Plan

(Save this form to your computer and type over it. The first two pages may be updated and used as your research plan attachment for form 1B)

Name _____

Period _____

Proposed title (subject to change):

Problem to be posed or question asked:

My hypothesis or hypotheses:

Materials I will supply:

Materials to be supplied by Mr. H:

Materials from other sources (explain):

List all chemicals that will be used along with any special handling, storage or disposal:

Planned procedure:

What is your independent variable?

What is your dependent variable?

What is your control?

What are your Constants?

Please explain the planned timing of your experiment – how long do you expect it to take and when you will work on it.

Please cite at least five references you have consulted while conducting preliminary research.

Name: _____

Project title: _____

(Do not use this page as part of your final research plan for your research plan attachment)

Please circle any of the following that apply to your project. Unless you have prior approval from me, a project containing any of these elements will be rejected. Approved projects containing any of these elements are subject to additional scrutiny, paperwork and deadlines before experimentation may begin.

Human subjects

Controlled Substances

Non-human vertebrate animals

Recombinant DNA

Pathogenic agents (bacteria)

Human or non vertebrate animal tissue

Hazardous chemicals

Dangerous equipment (welders or lasers)

Firearms

Radioactive substances

Radiation

Student Signature

Date
